

SARTHAK SHAHAJI JADHAV

📍 Pune, Maharashtra, India ✉ sarthakjadhav200206@gmail.com ☎ +9922995573 🔗 [linkedin Profile](#) 🌐 [Portfolio Website](#)

SUMMARY

Motivated software developer with hands-on experience in full-stack development (MERN), DevOps, and Generative AI systems. Skilled in building applications using the MERN stack, Next.js, and cloud tools. Experienced in developing LLM-powered applications, multi-agent systems, and RAG pipelines. Passionate about solving complex problems and building production-ready systems in Agentic AI and intelligent distributed systems.

EDUCATION

Bachelor of Technology (BTech), Computer Science

Vishwakarma Institute of Technology, Pune • Pune • 2024-2028 • 9.4

Class XII Science (MH)

Versatile Junior College • Pune • 2024 • 86.5%

Class X (CBSE)

City International School, Kothrud • Pune • 2022 • 90.20%

PROJECT

Plotoris : "All in One Research Platform"

<https://github.com/Sarthak-Jadhav-Dev/-PLOTORIS-> • plotoris.vercel.app/ • March 2026 - May 2026

- Plotoris acts as an AI-powered SaaS platform with a stunning interface designed for advanced digital research and multi-agent workflows.
- An all in one AI based platform where researcher can manage and orchestrate their research tasks.
- Improves Results with Context Rich AI Agents.

Inspectra :

<https://github.com/Sarthak-Jadhav-Dev/Inspectra> • January 2026 - March 2026

- Inspectra acts as an agentic AI coding assistant for the terminal and Telegram.
- It autonomously researches, plans, and edits code codebases with user approval. Built using Bun, OpenRouter, and TypeScript.
- An Personal Assistant which runs on your system and connects your Telegram with your Codebase.

EXPERIENCE

WEBDEVELOPER (PART-TIME)

Kids Trans EduTech

April 2025 - December 2025, Remote

- Build and maintained modern web applications using Next.js and MERN stack.
- Improved application performance and usability through optimized frontend architecture
- Assisted in deploying web applications and maintaining version control workflows.

CERTIFICATIONS

Certified DevOps Engineer

TuteDude • 2025

- Gained hands-on experience engineering CI/CD pipelines and containerising applications using Docker for consistent environment deployment. Configured and managed scalable AWS cloud resources, including EC2 instances, S3 storage, and IAM security policies. Additionally, leveraged Linux administration, Bash, and Python scripting to automate system tasks, while maintaining robust source code control via Git and GitHub.

Full Stack Generative and Agentic AI in Python

Udemy • 2025

- This advanced AI course covered building and deploying stateful multi-agent systems and Retrieval-Augmented Generation (RAG) pipelines. Key competencies included orchestrating workflows with LangGraph and LangChain, integrating OpenAI and Gemini APIs, deploying local models with Ollama, and containerizing applications with Docker.

SKILLS

Programming Languages : JavaScript, Python, C++.

Frameworks & Technologies : Docker, Git-GitHub, Kubernetes, Terraform, AWS, LangGraph and LangChain, Redis

Core Competencies : Full Stack Web Developer with MongoDB, Express, ReactJS, NodeJS & NextJS.
